Sign-in using UAE Pass

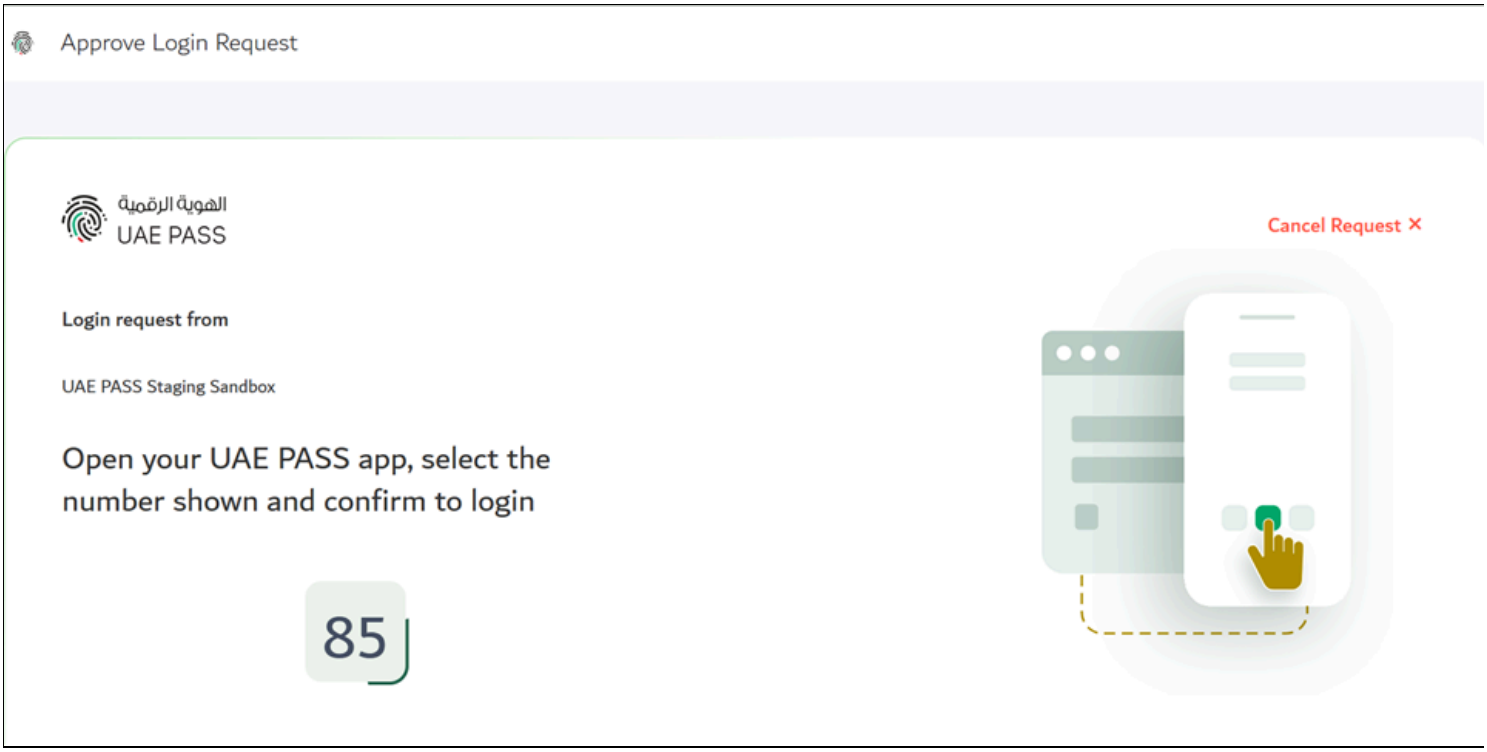

Click the **Sign in with UAE PASS** button. The **Login to UAE PASS** screen appears.

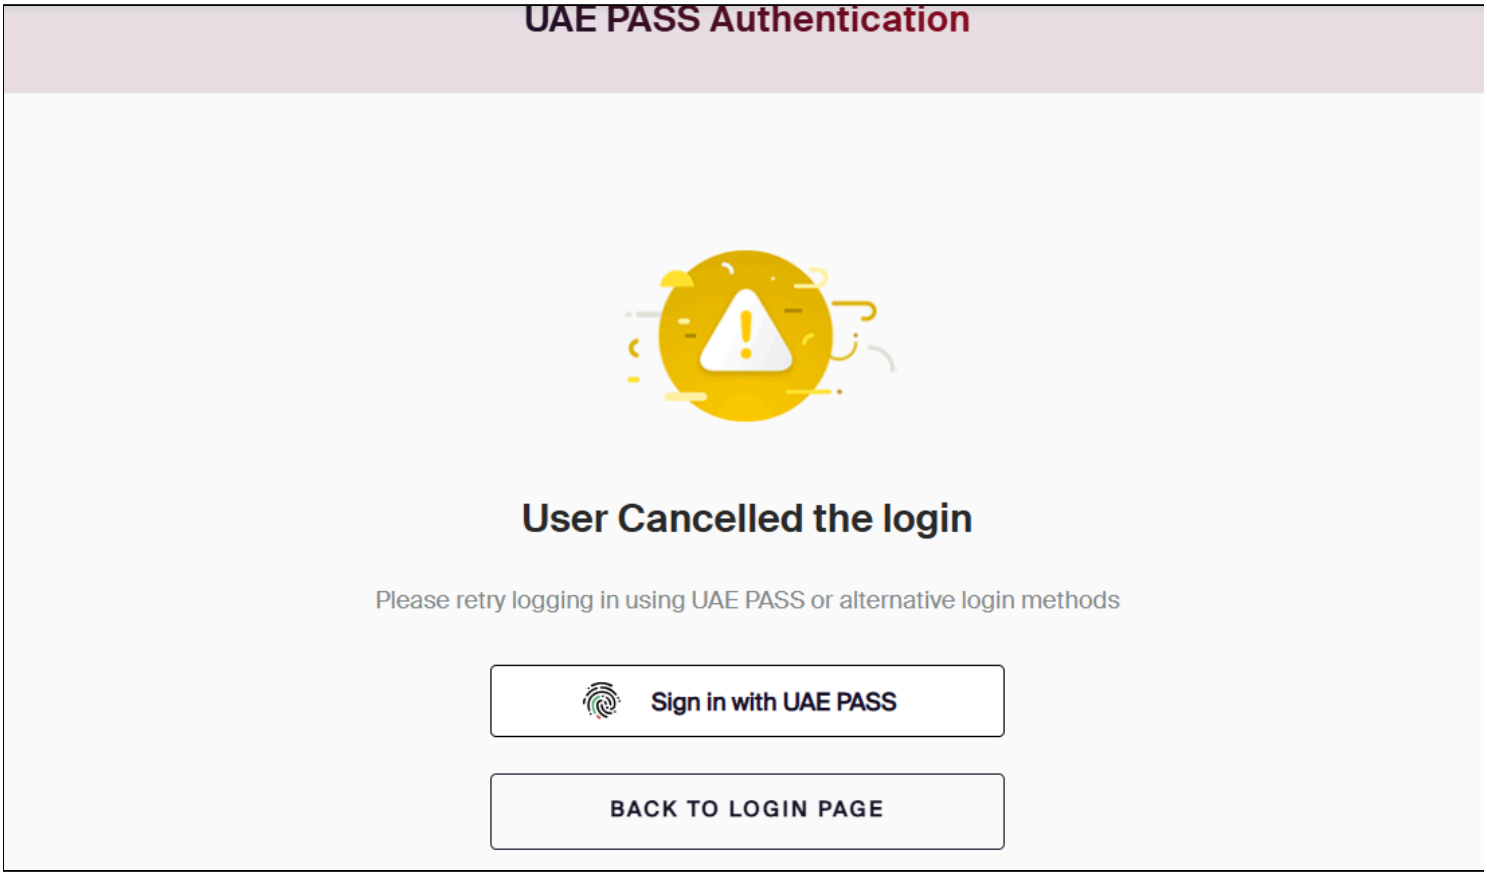

Enter the **Emirates ID or email address or UAE mobile number** in the displayed text box.

Click the **Login** button. The following screen appears.

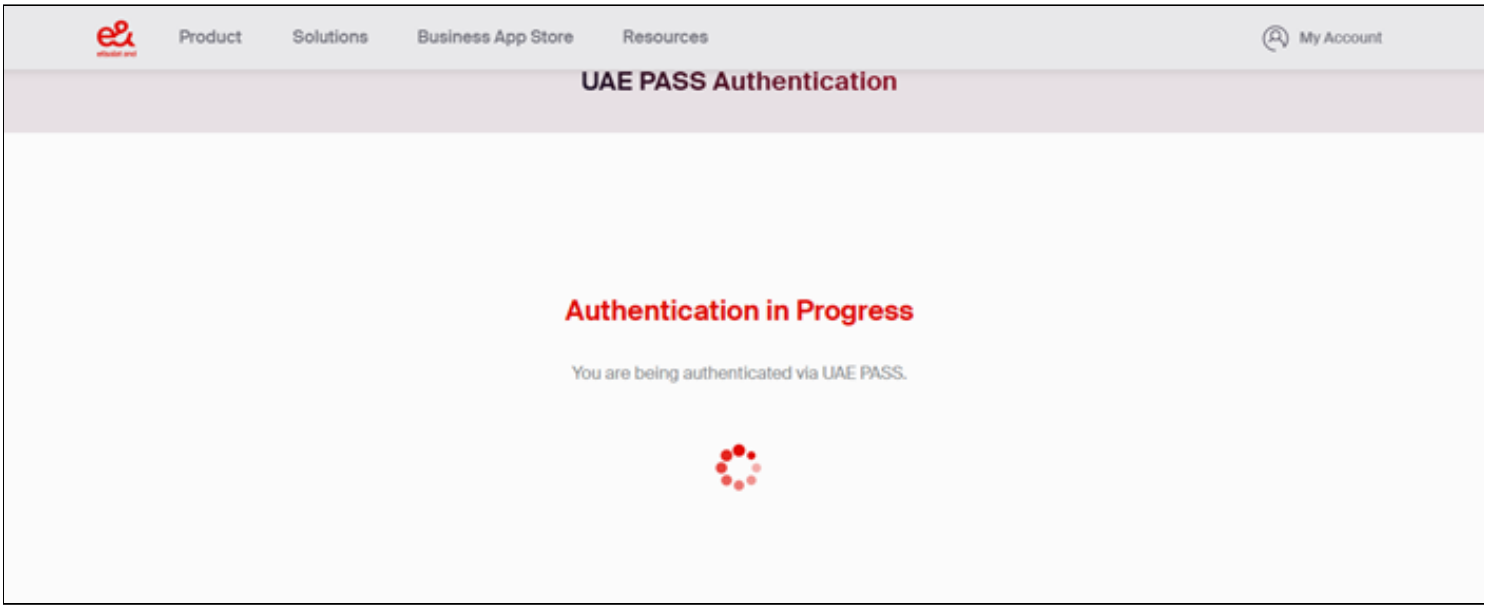

As shown in the above figure, the screen will prompt the customer to access the UAE PASS app on his/her mobile, and select the displayed number to confirm login. Optionally, you can cancel the sign-in process by clicking the **Cancel Request** button. If the customer cancels the log-in process, then, the following error message is displayed.

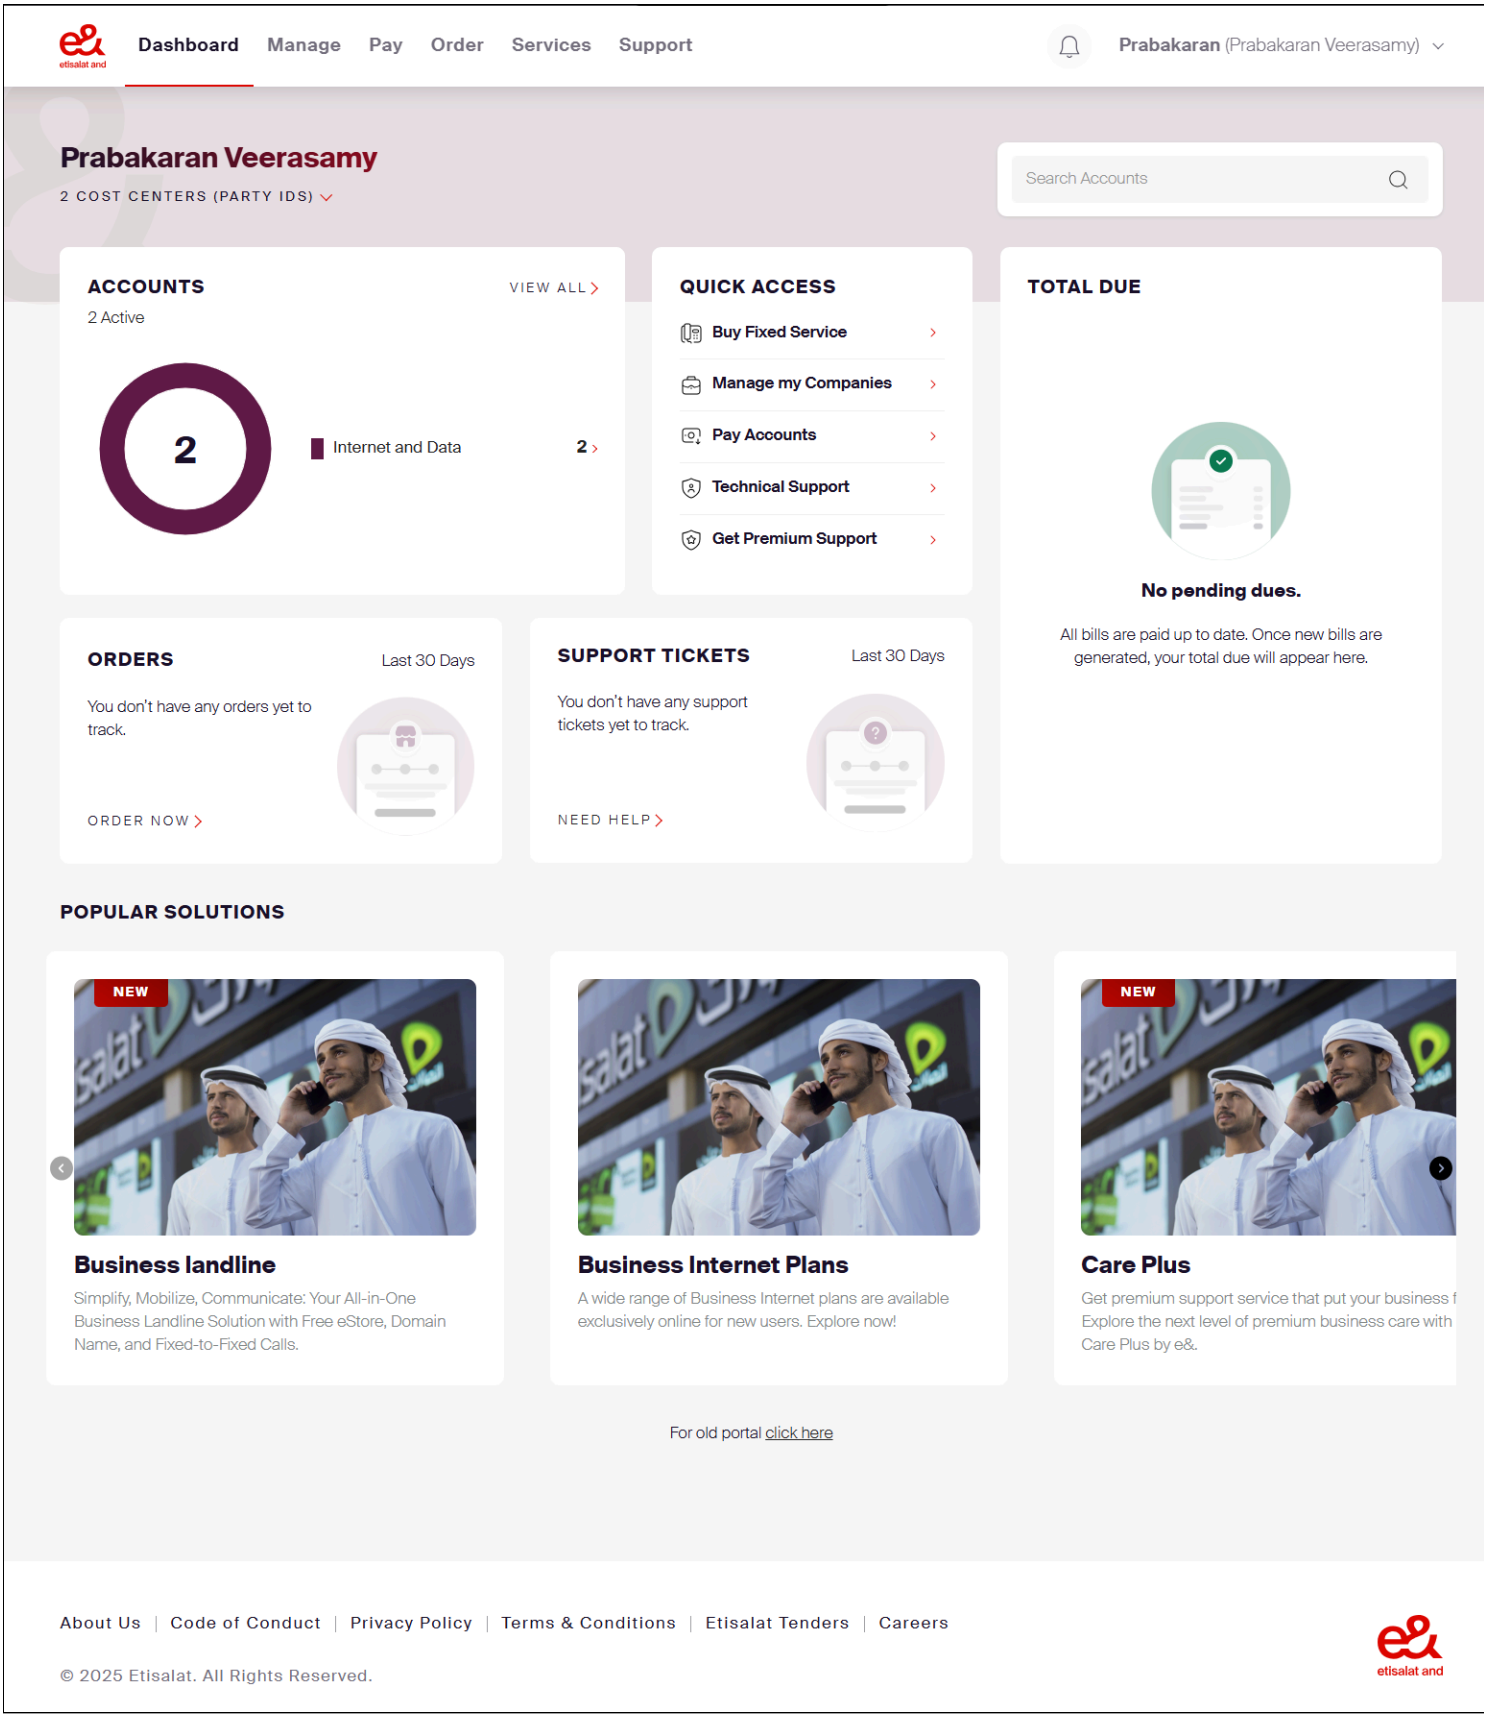

However, in this sample process, we are assuming that the customer is continuing with the log-in process.

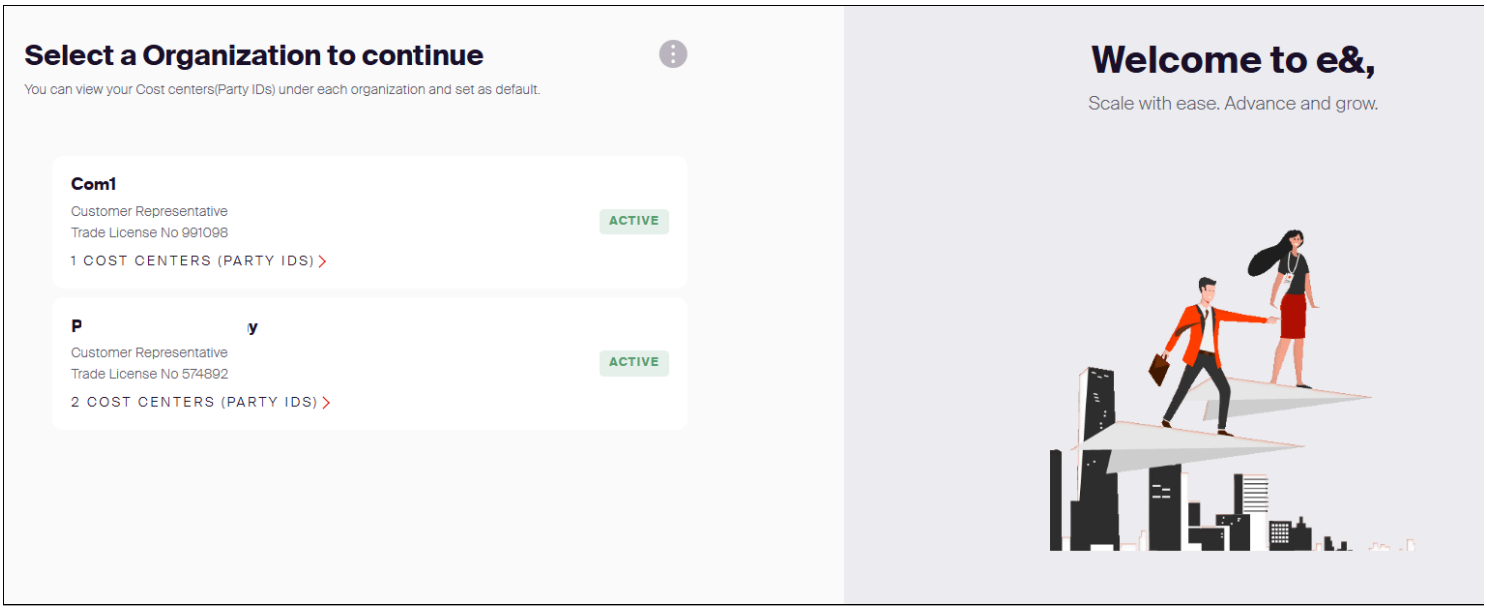

Upon approving the login request, the B2B screen will refresh, and the following screen appears on the screen.

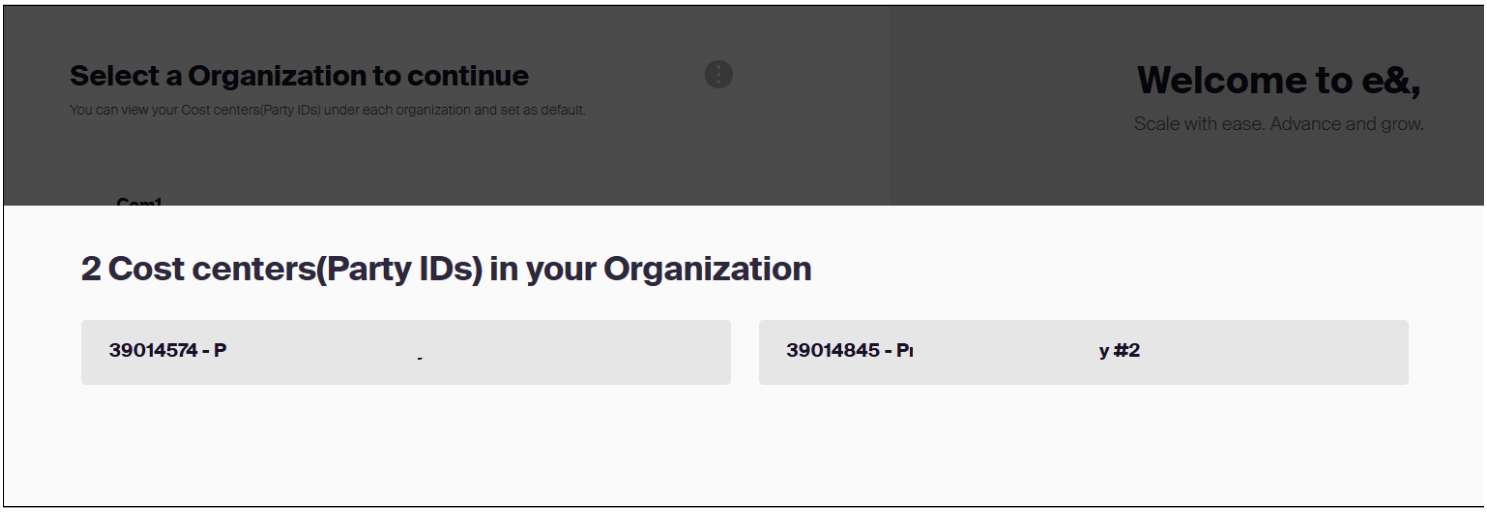

The system will authenticate the user profile using UAE PASS and logs-in to the B2B Portal. The **Dashboard** screen appears, displaying the details of the customer's default set organization.

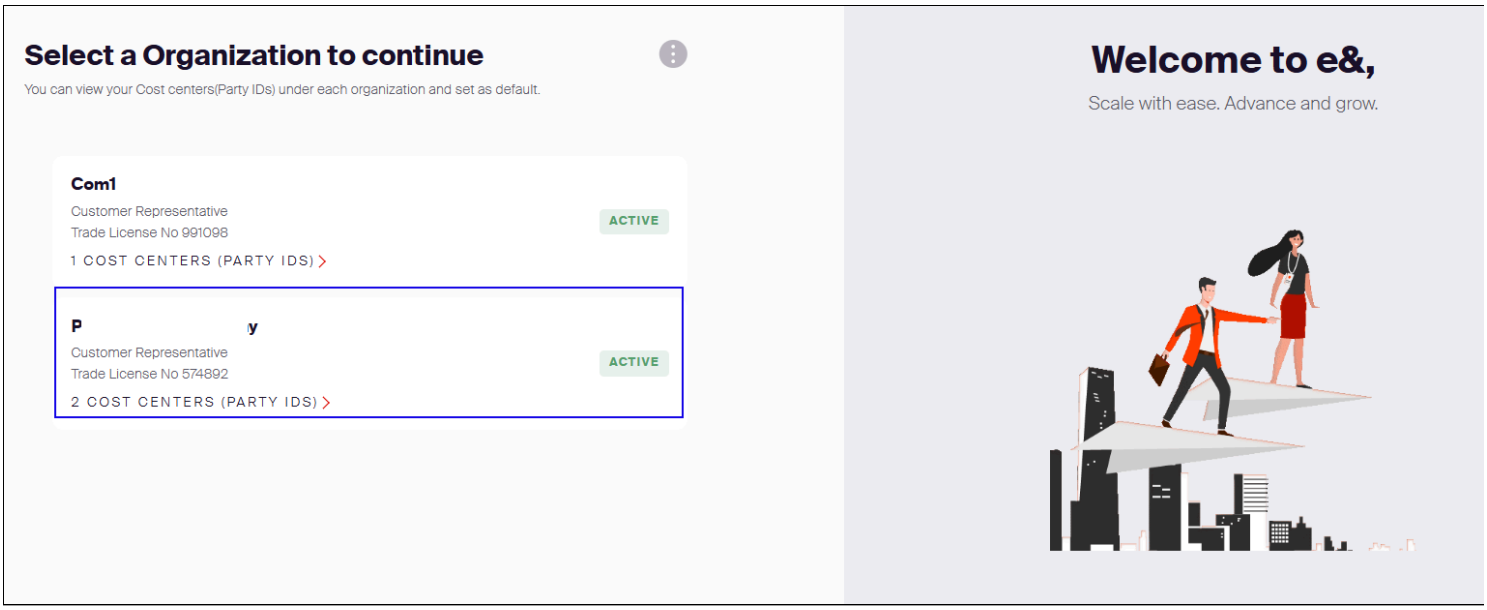

Note that, if there is no default organization associated to the B2B user, then the screen displays multiple organizations linked to the B2B user, as shown in the following figure.

Click the 2 COST CENTERS (PARTY IDS) icon to view the **Cost Centers (Party ID)** associated to the organization. The following screen appears.

Click the **Organization**. The Organization Dashboard appears where you can manage the accounts related to the organization, as shown in the following figure.
